Badiuk M.I., Biryuk I.G., Geruch I.V. et al. Premedical Aid in Extreme Situations: Tutorial book. Chernivtsi: HSEE of Ukraine «Bukovinian State Medical University», 2018. 196 p.

The tutorial contains the fundamentals of theoretical medicine and basic practical skills in organizing of premedical aid in extreme situation, as well as developed algorithms of giving aid in case of different life threatening conditions. All the practical skills and manipulations described in the tutorial correspond to international algorithms of giving premedical aid to patients and injured individuals.

The tutorial will help to acquire knowledge and skills in providing effective assistance under conditions of limited resources.

The tutorial is suggested for the students of higher medical educational establishments of Ukraine, branch of knowledge 1201 «Medicine», compiled according to the standard curriculum

on the educational subject «Premedical Aid in Extreme Situations», approved by the State Institution «Central Methodological Study on Higher Medical Education, the Ministry of Health of Ukraine» in 2015 (Kyiv, 2015).
