Kalinovs'ka I.V., Usko O.M., Lisova K.M. Test Control of Pressing Questions in Obstetrics. Chernivtsi: Bukovinian State Medical University, 2018. 137 p.

The test assignments of the manual cover a wide range of urgent issues of obstetrics. Special attention is paid to diagnostics, an approach of pregnancy and labor management in case of contracted pelves; breech presentations, anomalies of the birth activity, gestoses, placental insufficiency. The basic modern methods of diagnostics of the intrauterine condition of a fetus are dealt with.

The training publication is intended for students of medical faculties of higher medical educational establishments of the III^d- IVth levels of accreditation, internship doctors, trainee doctors and may be also used, while carrying out the final control in the process of training, built upon the European credit-transfer system.

A training aid for foreign students of medical faculties of higher medical educational establishments of the III^d- IVth levels of accreditation.
